Cyber-Safety Rule Book

How to prevent scams & phishing — and what to do if you are attacked

Privacy-first • Works offline • Protect yourself and your family

Know the enemy: 6 red flags of a scam

Scammers send fake SMS, WhatsApp messages, links, calls and screenshots. They win by making you panic or feel greedy. If you see even ONE of these signs, stop and think.

Urgency

"Act in 1 hour or your account will be blocked!"

Fake authority

Pretends to be your bank, police, courier, KYC or a government office.

Strange link

Odd or shortened web address you did not ask for.

Asks OTP / PIN

Wants OTP, PIN, CVV or password. No real bank asks for these.

Too good to be true

Lottery, prize, easy job, "double your money".

Install / share screen

Asks you to install an app or share your screen.

Example of a scam message

SMS

1 2 XYZ Bank: Your account will be BLOCKED today!

3 Update KYC now: http://xyz-bank-kyc.top/verify

4 Share the OTP to avoid penalty.

1 **Urgent threat**

2 **Fake bank name**

3 **Suspicious link**

4 **Asks for OTP**

⚠ Wants OTP, PIN, CVV or password. No real bank asks for these.

Prevention: 8 Golden Rules

1 Never share OTP, PIN, CVV or password
Not with “bank staff”, not with family friends on a call, not with anyone.

2 Pause for 10 seconds
Scammers need you to hurry. Slow down, then check.

3 Do not tap unknown links
Open your bank’s official app or type the website yourself.

4 Money in = no PIN
You never enter a PIN to RECEIVE money. Reject unknown “collect” requests.

5 Do not install apps on request
Avoid unknown APK files and screen-sharing apps like AnyDesk.

6 Verify on an official number
Call the number on your card or official website, not the one in the message.

7 Prizes and job fees are fake
You cannot win a lottery you never entered. Real jobs do not charge fees.

8 Lock your digital life
Use strong, different passwords, 2-step verification and keep your phone updated.

Your 3-step shield: Stop → Think → Verify

1. STOP
Do not react to fear or greed.

→

2. THINK
Is it urgent? Who sent it? Does it ask for OTP or money?

→

3. VERIFY
Use the official app or number, or scan it with the safety app.

✔ DO
- Check the message with the scanner app
- Show suspicious messages to

✖ DON’T
- Click, reply or call back the number
- Share OTP, PIN or card details

After the attack: act FAST

Money lost through fraud is easiest to stop in the first hour. Do not feel ashamed — report immediately.

1. STOP

Right now

Do not reply, do not pay more. Do NOT delete anything — take screenshots of messages, phone numbers, links and payment receipts as proof.

2. BLOCK

Within minutes

Call your bank / UPI app helpline. Block the card, UPI and net-banking and ask them to flag the fraud transaction.

3. CALL 1930

Within the first hour

Dial the National Cyber Crime Helpline 1930 to report the fraud as early as possible so the money can be frozen.

4. COMPLAIN

Same day

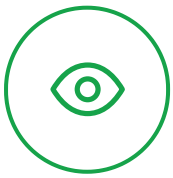

File a complaint at cybercrime.gov.in with your proof. Save the acknowledgement number. You can also visit the nearest police station.

5. SECURE

Same day

Change passwords from a safe device, turn on 2-step verification, log out of other devices, uninstall unknown apps and restart the phone.

6. WATCH

Next weeks

Check bank statements, report the number at sancharsaathi.gov.in (Chakshu), and warn family and friends about the scam.

How the safety app protects you

Risk meter

Safe	Suspicious	High risk	Dangerous
0–29	30–59	60–79	80–100

Example: HIGH RISK 94% — urgent language, bank impersonation, suspicious link, asks for OTP. → Do not click. Do not share OTP. Verify in the official bank app.

Your privacy comes first

- Works offline — messages are analysed on your device.
- Raw messages and screenshots are not uploaded by default.
- You control scan history and can delete it any time.

Quick safety checklist

- I never share OTP / PIN / CVV
- I do not click unknown links
- I verify using the official app or number
- I know the helpline: 1930
- I keep proof before reporting
